

## 2012 Benchmark Times

### Wakefield Park

O	S	A	B1	B2	C1	C2	D1	D2	E1	E2	Assoc
62.130	65.718	65.905	68.550	70.613	68.532	71.357	68.708	71.175	76.883	79.143	67.129

### Eastern Creek (Main Circuit)

O	S	A	B1	B2	C1	C2	D1	D2	E1	E2	Assoc
98.389	102.602	105.839	108.357	110.655	108.730	112.938	108.487	113.225	120.849	123.288	106.930

### Eastern Creek (South Circuit)

O	S	A	B1	B2	C1	C2	D1	D2	E1	E2	Assoc
TBA	TBA	TBA	TBA	TBA	TBA	TBA	TBA	TBA	TBA	TBA	TBA

Benchmark times are generally based on the best times recorded in the 2 prior years for cars in that class, and reflect the current makeup of the cars in a class. Where there is a small sample of results in a class, we may include earlier years so as to avoid large fluctuations year on year.

Items highlighted in **yellow** are ones where the 2012 benchmark is slower than 2011 benchmark. This would be caused by a previous record or fastest time from 2009 no longer being considered and the new time reflects the best time recorded in the past 2 years (2010 and 2011 seasons).

Items highlighted in **green** are ones where the 2012 benchmark is faster than 2011 benchmark. This would be caused by a new track record or a time faster than the previous benchmark being recorded in 2011.

### New venue for 2012

Eastern Creek South Circuit is a new venue and as yet there have been no events held. Therefore we are unable to determine benchmark times for this circuit at this stage. Our initial position is that the fastest time recorded in each class at the first event at this venue in 2012 shall be adopted as the benchmark time. However, where there are a low number of competitors in a class, we will also be cross checking with comparable times from other race meetings at the venue to determine a representative benchmark.
